CASH REGISTER AND BUSINESS MANAGEMENT

TFT14

INNOVATION

**MEETS EXCLUSIVE
DESIGN**

Our **Passion and expertise** led to the creation of TFT14, one of our best work which integrates CEI products line, that is specifically designed for automatic orders collection, cash register and business management

With its **new design**, TFT14 is an icon of Italian taste and quality and, thanks to its elegant shape, it matches perfectly with each kind of location.

Touch Screen, Touch&Write and Touch Planner systems make pages visualization even more intuitive and easy thanks to their **new graphics**, that helps you in saving time in your work and with your clients.

TFT14 is a perfect solution to improve your business with a reliable and high quality system, which is a direct result of **Italian expertise**.

o

WS500 PV200

TWO OPTIONS FOR YOUR SOFTWARE CHOICE

We offer 2 different software for TFT14, both customizable according to your business needs.

WS500 is a software specifically conceived for restaurants, especially if they have a high seating capacity and different areas to be managed. It is an innovative, reliable and simple product.

PV200 is suitable for other kinds of business, such as beach resorts, dry cleaners', discos, tobacconists, take away shops...etc. Its technological features will help you in managing in an easy and precise way your activity.

Some Functions

- Barcode reading
- Bills and revenue stamps distinction
- Invoices, receipts or bills print in a touch
- Self Card or other RFID identification supports management
- Internal and external video surveillance directly on your monitor
- Icons and templates customization
- Data sharing through Internet connection
- Apps for iPhone
- Provided with integrated printer or connectable with other of our external printers.

AVAILABLE IN SILVER OR BLACK

ATZ4 HANDHELD TERMINAL

Our handheld terminals, can considerably ease your daily work: for example, during orders collection in restaurants or in other business where remote communication is essential, as in beach resorts.

ATZ4 can be used in vertical or horizontal position exploiting Touch Screen, Touch & Write, Touch Planner systems. It is also provided with a voice messages option thanks to an integrated microphone and speaker.

This device offers also a function of automatic operators identification and clients management.

SPR33 REMOTE PRINTERS

Placed in the kitchen, in the lounge bar, near to oven or in some other places where food is prepared, they print orders or messages from handhelds, from RFID system and from all other supports connected. Possibility to connect up to 15 printers using a specifically created ISN485 line.

Bill, pre-bill, and fiscal documents print, even simultaneously.

SPR33D DOUBLE PRINTER

Created for printing on thermal paper invoices, receipts, internal bills and pre-bills. As for remote printers, messages received from Touch & Write System are printed in a specific frame.

Provided with a drawer for collecting receipts printed on continuous form paper.

If requested, a revolving display can be provided too.

It can be used with **WS500** and **PV200**.

SPR500 FISCAL PRINTER

High resolution thermal print and automatic cash drawer. It can be connected to WS500 or PV200 or to a 73 keys keyboard with a LCD backlit display 20 x 2 characters.

Logo and courtesy message customized print.

CASH MANAGER

CONNECTION TO WEB PORTAL

It is a very useful software that, exploiting remote control, allows you to manage your business situation directly from your pc, smartphone or tablet. You can choose among 3 different levels of use.

Level 1

- Cash Register situation in real time
- Sales statistics
- Specific Analysis to check the amount of sales for product, families, departments, operators. Etc.
- Reports conversion on Excel

Level 2

- In addition to level 1 it allows cash register remote control in order to change its settings.

Level 3

- In addition to levels 1 and 2, it allows to manage incoming and outgoing goods in your store.

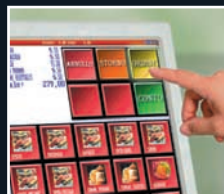

CLIENT REMOTE STATION

It can be used as second cash register, with the same characteristics of the main one. The operator can also use it instead of ATZ4 to send orders or messages.

Used in combination with RFID system it becomes available also for clients, so they can check their orders and demand for bills and pre-bills.

It can be programmed to show customized messages, ads, promotions, events, ecc.

RFID IDENTIFICATION SYSTEM

Self Card or other **RFID devices** are used in our cash registers to manage clients and operators.

This system helps clients in managing independently their orders or their demand for bill.

Excellent for restaurants, self services, beach resorts, hotels, discos and other more kinds of business.

It allows operators' identification without any password or intrusions in sections different from the ones initially set up for each operator.
